Juno Lighting Group Unveils Significant Enhancements to the 3 1/4" Aculux Precision Recessed Lighting Portfolio

Aculux is establishing a new benchmark for excellence in the precision lighting segment by incorporating several exclusive and innovative features in the 3 1/4" architectural grade product line

Des Plaines, Ill., May 12, 2010 — Juno Lighting Group®, a subsidiary of Schneider Electric, and a leader in offering high-quality and innovative commercial and residential lighting solutions, announced today that it is expanding the Aculux product line, a comprehensive offering of architectural grade precision recessed luminaires for residential and commercial applications. With the introduction of a completely re-engineered 3 1/4" line of round and square apertures, Aculux is incorporating several exclusive and innovative features such as Acu-Aim™ precision geared optics and patent pending Tru-Line™ platform to help achieve the perfect installation.

Building on over a quarter century of leadership in recessed lighting, Aculux precision recessed luminaires offer feature-rich solutions for residential and commercial applications that require high performance, space-enhancing illumination. Aculux's new 3 1/4" adjustable apertures are equipped with new Acu-Aim™ precision optics featuring optimized center-beam optics and hot aiming capability utilizing precision gearing to achieve 370 degree rotation and 45 degree tilt. A vast selection of lamp choices to suit a broad range of lighting environments are available including energy efficient light emitting diode (LED) and ceramic metal halide (CMH) technology along with MR16 Halogen and PAR incandescent lamps. The combination of these features and lamp options allow designers to illuminate rooms with the desired levels of relative lighting emphasis in every space while meeting today's stringent energy requirements.

Aculux's 3 1/4" round and newly introduced square fixtures offer a vast range of trim styles, construction, and finish selections to provide the lighting designer or architect options that are aesthetically pleasing. For a clean, seamless ceiling appearance, flush mount trims are now available including the flangeless regressed pinhole which provides a truly trimless appearance. In addition, die cast, parabolic square trims are performance engineered to eliminate corner seams and flange misalignment, as well as provide glare-free, low brightness apertures.

Press Release

Engineered for precision installation and easy maintenance, Aculux's 3 ¼" luminaires are equipped with new Pro-VI™* bar hanger system which utilizes interlocking channel bars for maximum rigidity and smooth, non-binding translation. The Tru-Line™* platform simplifies fixture to fixture alignment during installation by allowing +/- 45 degrees aperture rotation for square housings and +/- ½" aperture translation on all housings, providing the specifier with peace of mind.

"The Aculux series from Juno Lighting Group has been providing residential and commercial buildings with the most feature-rich, versatile and sophisticated precision lighting solutions since 2001," said John Whittenhall, LEED AP, product management specialist, Juno Lighting Group. "These industry leading enhancements to the Aculux product line provide architects, design professionals and contractors with lamp options to provide increased energy efficiency and precise lighting features for creating stunning visual effects."

The new 3 ¼" luminaires and all Aculux solutions are currently available through Juno Lighting Group. For more information on Aculux precision recessed lighting, visit www.junolightinggroup.com.

About Schneider Electric

Schneider Electric, a global specialist in energy management, is a leader in offering high-quality, innovative commercial and residential lighting solutions and advanced system controls. Schneider Electric provides lighting fixtures offered in the product ranges of Juno®, Indy™, AccuLite™, Aculux®, NaviLite® and DanaLite. Schneider Electric lighting and control solutions including Powerlink™, C-Bus™ and Cassia™, provide one of the most comprehensive energy-saving offers in the industry, combining automated and web-enabled control with occupancy-based solutions and dimming capabilities. www.junolightinggroup.com
