**FOR IMMEDIATE RELEASE**

**NEW INCANDESCENT LUMINAIRES COMPLEMENT INDY™ DESIGNER SERIES  
ARCHITECTURAL RECESSED LIGHTING  
*New Incandescent Lighting Meets Industry Needs***

**DES PLAINES, Ill. (March 1, 2007)** — Juno Lighting Group® has introduced to it's Indy™ Designer Series line new incandescent and low voltage downlights and adjustable accent luminaires. The new Indy Designer Series incandescent luminaires feature the same outstanding glare control that is synonymous with the Designer Series, providing the much-desired "quiet ceiling" appearance.

The line voltage PAR30, PAR38 and PAR56 incandescent products are offered in 4", 6" and 8" round aperture sizes in both the downlight and adjustable accent versions and feature the glare controlling, Alzak satin-finished cone that reduces the distracting flash or hot-spot typically associated with PAR lamp luminaires.

The T-4 Tungsten-Halogen downlight and adjustable accent luminaires are available in a narrow, medium and wide beam distribution up to 500 watts. The lamp-dedicated optical system takes full advantage of the high lumen T-4 lamps, delivering excellent beam control while providing outstanding candlepower production.

The low-voltage MR16, AR70 and AR111 luminaires are offered in 4" downlight and adjustable accent luminaires, and as with the PAR30 and PAR38 luminaires, feature 355° rotation and up to 45° tilt of the lamp with lockable aiming. The PAR56 and T-4 products have 355° rotation and up to 35° tilt of the lamp.

All Indy Designer Series products are available in an array of satin finishes.

## *Indy Incandescents*

2-2-2

### **Indy™**
