**FOR IMMEDIATE RELEASE**

**JUNO LIGHTING GROUP® INTRODUCES NEW JUNO® CFL LENSED TRIMS**  
*New Designs Conserve Energy and Perform With Style*

**DES PLAINES, Ill. (April 23, 2007)** — Juno®, a Juno Lighting Group® brand, has introduced new CFL lensed trims that capture the benefits of higher light output, longer lamp life and energy savings while adding style to any home.

Designed to imitate the experience of traditional incandescent lighting, Juno lensed trims conceal the CFL lamp with an enhanced glass lens. The specially designed diffusing lens obscures the CFL lamp image while providing even illumination on the glass and softening the harsh light of compact fluorescent lights.

Among the new introductions, the Juno 2330 CFL lensed trims provide a regressed baffle design and frosted dome lens positioned above the ceiling plane. The Juno 2330 trim offers better illumination and uniformity than an incandescent open white baffle trim. In particular, the 2330W-WH model features a compact fluorescent trim with a 6-inch regular lens baffle to provide the look and performance of an incandescent trim.

Available in traditional or beveled trip designs, Juno CFL lensed trims are offered with new construction or remodel CFL housings to meet a variety of applications. All the trims are optimized for usage with CFL lamps in either Juno 5" or 6" ICPL/PL housings.

The new CFL trims are ideal for residential usage and address homeowners' concerns with CFL downlighting such as glare, low lamp position, lamp image cut-off and poor CRI.

## **Juno®**

Juno recessed and trac lighting offers distinctive, high-quality lighting that is easy to install. Juno is regarded as the market leader in the track lighting category. Juno's products – which are used in retail stores, hotels and restaurants, residences and commercial buildings – include Trac-Master® and Trac 12 lighting systems, award-winning MH2, CMH downlights, and undercabinet lighting.
